THE ALL NEW

**WINGUARD** winSPIKE3  
STUDDABLE WINTER

**UNCOMPROMISING PERFORMANCE  
IN SEVERE WINTER CONDITIONS**

## SEVERE WINTER CONDITIONS DEMAND SERIOUS TIRE PERFORMANCE.

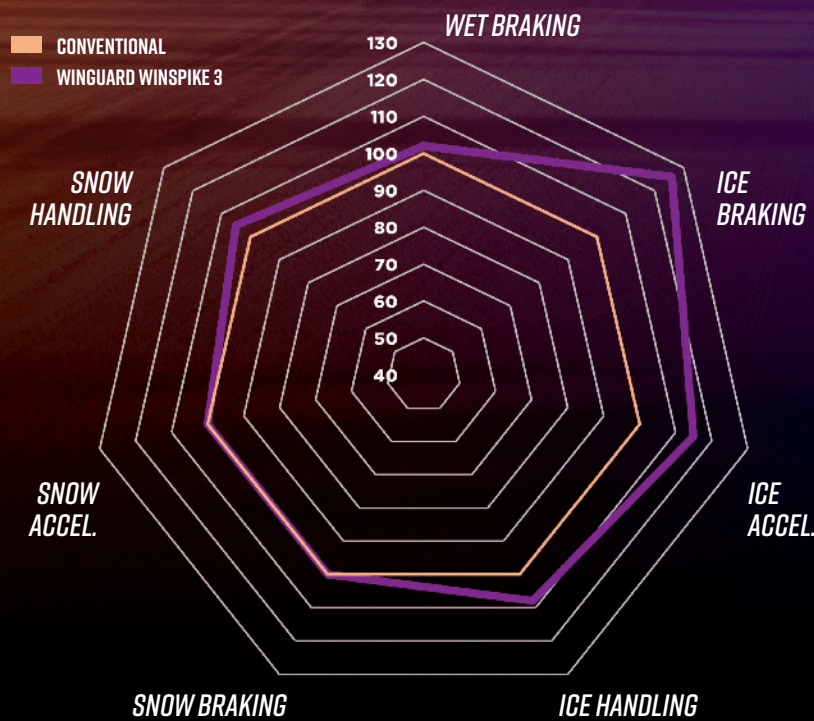

The Winguard Winspike 3 sets new standards and higher levels of winter tire drivability with an increased contact patch that improves braking. Extended tread depth improves acceleration. Advanced tread design expels more water, slush and snow—this is a tire that you will trust when it comes to the extreme stuff. And the Winspike 3 features newly developed Stud Pin technology that makes conventional studs obsolete while delivering performance you never thought possible. At Nexen we take severe conditions and your safety seriously...and every winter it shows.

SIZES AVAILABLE	83
RIM SIZE	13" - 20"
SPEED RATING	T

## SETTING HIGH PERFORMANCE STANDARDS AT EVERY LEVEL

Winguard Winspike 3 meets and exceeds conventional winter tire overall performance characteristics.

SUBJECT		WINGUARD WINSPIKE 3	CONV.
WET	BRAKING	102	100
	ACCEL.	126	100
ICE	BRAKING	115	100
	HANDLING	108	100
SNOW	BRAKING	100	100
	ACCEL.	100	100
	HANDLING	105	100

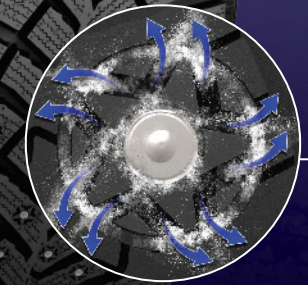

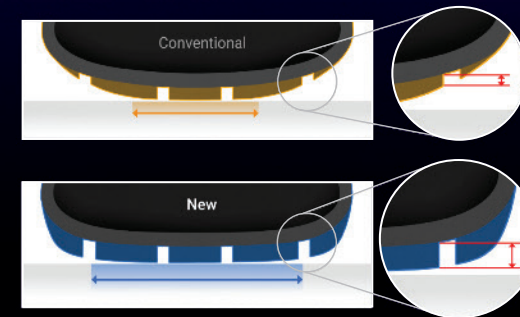

## IMPROVED CONTROL ON SNOW AND ICE

Unique Nexen 3D Kerf Technology allows the control block to stay in constant contact with the road surface, increasing overall handling performance in snow.

## EXPANDED CONTACT SURFACE

The stretched tire edge provides a larger tire-to-road contact area overall, while the extended tread depth prevents tread distortion, keeping the tread surface in constant contact with the road—delivering improved control, acceleration and braking.

## IMPROVED STUD PIN PERFORMANCE

Keeps the area around the stud pin clear of ice and snow powder while driving, improving overall Stud Pin capabilities—grip, control, acceleration and braking.

\*Stud pin compatible: T.S.M.I. #12

DESIGNED TO FIT TODAY'S MOST POPULAR CARS, TRUCKS, SUVS AND CUVS

## WARRANTY

The Winguard Winspike 3 is backed by Nexen Tire's Roadside Assistance Warranty for 36 months.

**36 MONTHS**  
ROADSIDE ASSISTANCE

## IMPROVED BRAKING PERFORMANCE

The stretched tire edge increases the tire tread contact area, the key to better wet and ice braking. And an extended, deeper tread depth grips in snowy conditions while expelling more water, mud and slush.
